

# Caddie Budget Architectural

The Caddie budget Architectural package is a product of the latest Caddie Professional Version 7. It is discipline specific and has enabled us to make highly productive CAD available to those who do not require the flexibility and versatility of the full professional package, but still require a high degree of productivity at an affordable price.

Based on Caddie Professional version 7, the budget software contains most of the latest features of the Professional version, including AutoCad R2000 read/R14 write (2D), TrueType fonts, hatch fill etc. Being discipline specific, the budget version does not support third party, or other discipline applications. If these are required at a later date, an upgrade to the full professional version is required. The drawing format of the budget package is fully compatible with the professional version, however referenced symbols cannot be stored or changed in the budget version.

The following Caddie Professional commands are not available in the Caddie Budget software:

Files:	OpenRef, SaveRef	UnMrPts, MarkPts, UnMrEXT,
Modify:	EditSeg, BrOutPnt, BrkOuElm	MarkEXT
Pattern:	IntSym, IntTxCr	SCOPE: LGpSet, LGpDsp, LGpCpy,
	DbIndex, Attrib, EditLay,	Q-Lay
	MergePol	DIMS: ParAngl, Chamfer, X-Y Pos,
RefSyms:	List, Delete, Explode	WitIn-V, WitIn-H, Circum,
LINES:	Par-Pnt, ParMult, HoldAng,	DimAlign, AutoDim
	MvLnEnd, RectOrg, Polygon	MEASR: XY Dist, Ang2Pts, Ang-Lns,
CIRCL:	C---3E, Par-Pnt, ParMult	Inertia
CnLIN:	Par-Pnt, ParMult, ColSet, ColEdt	TEXT: On-Elm, UP-low, SizeAut,
CnCIR:	C---3E, Par-Pnt, ParMult, Radial,	CpyInc, CpyEdt
	ColSet, ColEdt	DELETE: Polygon, Ref-Sym
TRANS:	Matrix, Mir-Lin, FitPat, PatR90,	HATCH: SwapDIR, DimBlok, TxtBlok,
	PatR-90, PatMHz, PatMVt	Inside
MARK:	UnMrPol, MarkPol, UnMrPln,	
	MarkPln, UnMrP/L, MarkP/L,
